SKILLS

PROGRAMMING

LANGUAGES:

Javascript • Typescript • Python

LIBRARIES/Frameworks:

React.js • Next.js • Redux • Bootstrap

• Tailwind • Material UI • Materialize

CSS • Firebase • Express.js •

PostgreSQL • MongoDB

TOOLS/PLATFORMS:

• Heroku • Vercel • Firebase • Git •

Netlify

PERSONAL PROJECTS

DEVHUB

React.js, Firebase, Materialize CSS

Devhub(A Social Platform for developers)

where everyone can show their projects, and get connected, and a chatroom where Developers can help new folks in solving their doubts, discuss their upcoming projects, and much more.

GITSEARCH

React.js, Github API, Materialize CSS

A better way of looking at a GitHub profile where u can search any GitHub profile. Search any GitHub profile. You will get the entire detail of a profile that includes the no. of followers, following it. You can also view all the repositories it has through the link.

EXPERIENCE

SMART SIGHT INNOVATIONS, INDIA | SOFTWARE ENGINEER

May 2021 – Present

SLIM2.0 - A LAWYER FIRM WEB APPLICATION

As the developer, I designed and developed a web application with 8+ modules, including User Management, Client Management, Case Management, Calendar and Scheduling, File and Document Management, and more, ensuring seamless integration between them.

- Developed user interface codes of web applications using responsive and reusable UI elements via React, and Redux for smooth performance.
- Constructed RESTful APIs with Node.js and Express.js for Calendar and System maintenance. Utilized PostgreSQL databases to streamline data. Integrated Sendgrid and Twilio for notifying scheduled appointments and messages/emails.
- Participated in collaborative team efforts to resolve, find and implement efficiencies.

JOYKATE

- Developed reusable components with User Authentication and Authorization Module.
- Integrated Stripe payment system using React and Material UI.
- Created highly responsive user interface components using React Fundamental.

HRMS

- Designed and Developed a comprehensive HRMS project with multiple modules like *Leave Management, Recruitment Management, User and Query Management, Permission and System Management Module* and more.
- Utilized Redux for state management and Bootstrap for styling.
- Integrated Adobe PDF Embed API for PDF creation
- Created RESTful APIs with Node.js for Leave Management Module.
- Conducted unit testing and integration testing

IDEAMAGIX, THANE, INDIA | FRONT END DEVELOPER

Sept 2020 – Dec 2020

- Developed various User Interfaces for several websites using Material UI and Bootstrap that include JRR Construction group, Infinity Impex, and Red Thin line Production House companies.
- Designed and Developed UI for the Application, tested and created complex validation codes using Vanilla Js and JQuery for the entire User and Admin panel.
- Collaborated with senior leaders, approached problems and found solutions.
- Documented and tested new software applications.
